

**MIDDLETOWN VETERINARY HOSPITAL
366 WARWICK RD.
MIDDLETOWN, DE 19709
(302)378-2342**

We at Middletown Veterinary Hospital strongly believe in the importance of pain management before, during, and after surgical procedures such as: spays, neuters, dental procedures, lump removals, declaws, etc. We realize pets experience pain and discomfort during these procedures although they may appear unaffected. Pain management can help minimize your pet's discomfort and speed the healing process. We offer a pain management package for your pet that will include a pre-surgery pain injection, analgesia with anesthesia, and some take home products for you to administer at home

Canine Pain Management Package includes: Rimadyl Injectable before surgery, analgesic anesthesia, and appropriately sized rimadyl caplets for at home use.

Dogs under 25 lbs	\$12.00
Dogs 25-50 lbs	\$18.00
Dogs over 50 lbs	\$24.00

Feline Pain Management Package includes: Torbutrol injectable before and during surgery, local ring blocks for declaws, and torbutrol tablets for at home use.

Cats	\$18.00
