PAIN MANAGEMENT PACKAGE

We at Middletown Veterinary Hospital strongly believe in the importance of pain management before, during and after surgical procedures such as: spays, neuters, declaws, lump removals, dental procedures, etc. We realize pets experience pain and discomfort during these procedures although they may appear unaffected. Pain management can help minimize your pets discomfort and speed the healing process. A pain management plan will be tailored to your pet by their veterinarian based upon age, health status, and procedure(s) performed.

Canine Pain Management Package- includes an injection before surgery and appropriate medication for at home use.

Dogs under 25 lbs	<u>Cost- \$26</u>
Dogs 25-50 lbs	<u>Cost- \$35</u>
Dogs over 50-75 lbs	<u>Cost- \$41</u>
Dogs 76-100lbs	<u>Cost \$46</u>
Dogs over 100lbs	<u>Cost- \$50</u>

Feline Pain Management Package- includes an injection before surgery and appropriate medication for at home use.

All Cats \$29
